

Engineering Leadership Code of Ethics

Mohammad Saif Uddin

1. Safety First

I will prioritize public and team safety in all engineering decisions and designs, ensuring compliance with standards and refusing to cut corners.

2. Technical Integrity

I will report results honestly, resist data manipulation, and make decisions grounded in facts, not pressure or politics.

3. Fairness and Equity

I will ensure equal opportunities in team assignments, feedback, and promotions, avoiding favoritism and bias.

4. Transparency

I will be open about decisions, timelines, and expectations, and I will clearly communicate risks and changes with stakeholders.

5. Accountability

I will take ownership of both successes and failures, and I will encourage a team culture of responsibility.

6. Respect for Diversity

I will embrace diverse perspectives and foster inclusive collaboration among multicultural teams.

7. Continuous Growth

I will stay updated with ethical and technical standards through lifelong learning and certifications.
